Keywords: Editorial, Supplement, Clinical Video Lecture, Abstracts

The Archives of Pediatric Neurosurgery Journal is proud to announce the release of its inaugural Supplement, marking a significant milestone more than three years since its establishment. The editorial team recognizes the continuous flow of scientific production, and the decision to introduce occasional supplements, prior to increasing the official journal numbers, underscores the steadfast and consistent publication policy of the APN.

In this supplement, we featured the abstracts from the "XIV Congress of the Brazilian Society for Pediatric Neurosurgery (SBNPed)" held in Goiânia, Brazil, from August 2 to 5, 2023, under the presidency of Dr. Paulo Ronaldo Jubé. Additionally, we also included videos of lectures conducted and endorsed by SBNPed and APN.

The Archives of Pediatric Neurosurgery Journal acknowledges the importance of research in Pediatric Neurosurgery and recognizes Brazil's leadership in various fields. We support the initiative to publish congress abstracts and encourage authors to submit their work as full articles for evaluation and potential publication.

Another key aspect is the promotion and encouragement by SBNPed and APN of symposia, making some lectures available for readers to benefit from, thereby fostering the dissemination of scientific knowledge. This supplement comprises three lectures from the 2020 Neuroendoscopy Symposium delivered by Dr. Ricardo Santos de Oliveira, Dr. Marcelo Volpon, and Roberto Alexandre Dezena.

We extend our gratitude to the entire editorial team, authors, and reviewers who contributed to the growth and development of the journal in 2023, and we look forward to an even more successful year in 2024!
